**On the top part of your head lives
an old bone. The brain is protected
by this bone. We call him Cranium.
Cranium is very weird shaped. We
sometimes call him uranium.
Because just like uranium, cranium
is hard and round.**

Cranium is a very hard headed old bone and sometimes gets on our nerves. But if it was not for him our thoughts would have been shown. So when you're thinking everyone could see it. But not when cranium is around.

Cranium comes in all types of size and shapes. But who are we to judge the bigger cranium the bigger the brain.

He's with us when where awake he knows when you want to sleep so therefore be good for goodness sake. Cranium sense something before it even comes out your mouth. He is what we call the magical head that would be with us for the rest of our lives. He's always the last one to leave and for that we love Mr. Cranium.....

THE END!!!

The story “Those bones on top of my head” came from a creative part of my mind. I think people tend to forget how important our skull “Cranium” is and we don’t take it as serious as our other bones. I love my Cranium and I take good care of it and I want it to be with me for the rest of my life.
